400K BTU Diesel Units

300K BTU Heating 400m3

1 Mil BTU Natural Gas Units

Compact, Cost Effective, User Friendly

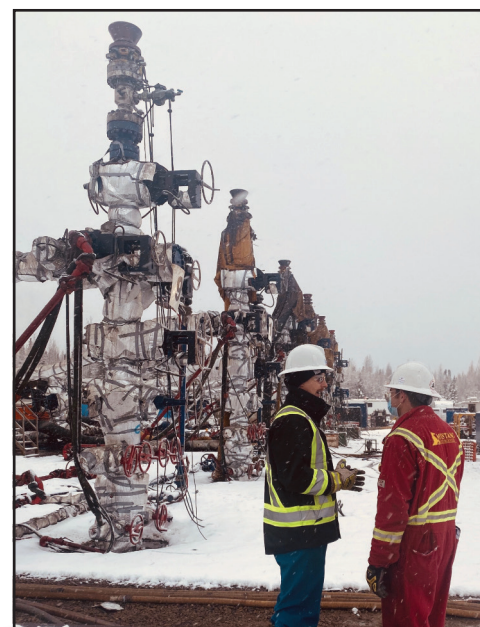

Heavy Horse Hydronic Heaters circulate heated food grade biodegradable glycol. The glycol can be used to heat:

- Any tanks which have existing 1" or 2" steam coils
- Heat trace required flow lines (2" to 20")
- Substructures, enclosed well heads or buildings with the use of our explosion proof air exchangers

Heavy Horse Glycol Heaters:

- 1/3 the cost of boiler rental and 1/2 the fuel consumption
- Run efficiently, unattended for weeks, as they are not a pressure device
- Operate at over 85% efficiency
- Have a footprint of 10% compared to a traditional boiler
- Eliminate frozen lines and open-ended steam lines
- Offer efficiency and run for weeks unattended
- Provide adjustable fluid temperature from 100 – 200 degrees Fahrenheit
- Eliminate GHGs with the use of our electric units
- Pump heated glycol long distances: 500' horizontal and 100' vertical with the use of booster pumps
- Highly portable. All units have crane lifting bars

NATURAL GAS, DIESEL AND ELECTRIC UNITS AVAILABLE
300,000 BTU to 1 Million BTU

3 x 1 Mil BTU Natural Gas Unit

Heavy Horse Exclusive!!

Electrically Powered Glycol Heaters

Fast to Install & Easy to Operate

Rugged Enough to Handle any Drilling or Fracking Operation
